12. Gao Xingyuan is a graduate student of MTI (Master of Translation and Interpretation) program at the School of Foreign Languages, Chongqing Technology and Business University. Gao has actively taken on translation practice and has won prizes and honors in English competitions.

The Yangtze River is the mother river of Chinese civilization, and Yangtze River Economic Belt became China's national strategy in 2013, emphasizing ecological priority and green sustainable development. Ever since, the research on the green transformation and development of Yangtze River Economic Belt has boomed at home and abroad. Yet, there was little systematic research on the green development of the tributaries of the Yangtze River. As the largest tributary of the upper reaches of the Yangtze River, the Jialing River's eco-environmental governance is crucial for the construction of Yangtze River Economic Belt as a pioneer demonstration belt of China's ecological civilization. So, this book introduces the discourses of state leaders on eco-environmental construction, reviews the existing mechanisms of coordinated eco-environmental governance in river basins in China, and summarizes the achievements of coordinated eco-environmental governance in Yangtze River Economic Belt. Then, it studies Jialing River Basin's coordinated eco-environmental governance measures, ecological industrialization, industrial ecologization development, environment-economy-society coupling development, ecological pressure and etc. Additionally, this book compares the coordinated eco-environmental governance of the Wujiang River Basin, another tributary of the Yangtze River, and the Thames Basin in the UK. On this basis, a networked eco-environmental governance mode and implementation path in the Jialing River Basin are proposed.

Luo Zhigao, M.A. in English, Ph.D. in Economics, M.A. Supervisor, Professor of School of Foreign Languages at Chongqing Technology and Business University, leader of the teaching and research team for English of economics and finance and member of the Upper Yangtze River [Basin] Complex Ecosystem Management Innovation Team. Luo's service in the academic community includes: executive director of Chongqing Foreign Languages Society, director of Chongqing Regional Economics Association, and reviewer of several international journals. Luo has published a number of papers in international journals like *Environment, Development and Sustainability*, *Journal of Cleaner Production*, *Sustainability*, *PloS One*, *The Educational Review, USA*. He has also published over 10 papers in prestigious Chinese journals, such as *Reform* and *Foreign Languages and Literature*. In recent years, he has served as the chief editor of a series of English textbooks titled "*Interpreting China's New Economic and Financial Phenomena*", which have been adopted by several universities in China.

Yang Jirui, Ph.D. in Economics, Professor, and Doctoral Supervisor, is a renowned economist in China. Yang has successively served as Vice President of Sichuan University, Deputy Party Secretary of Southwest University of Finance and Economics, President of Chongqing Technology and Business University, Party Secretary of Chengdu International Studies University, and Provincial Government Supervision Commissioner. Currently, he is the Honorary Chairman of the Chengdu Social Science Federation, Chairman of Academic Committee of the China Consumer Economics Association, and Vice President of the China Regional Economics Association. Yang is one of the first experts to receive the State Council Special Allowance and has been awarded multiple provincial and ministerial-level research honors. His research interests include China's economic reforms, regional economy, and real estate economy. He has published more than 350 academic papers, authored 31 monographs, and presided a considerable number of national and provincial research projects.
